WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 100 mm of 40 x 3 strip. Bend 25 mm at each end to 90 degrees, same way, to make a U: base 50 mm, two lugs 25 mm.

Base: two 6.5 mm holes, 10 and 38 mm from the rear end, centred.

Lugs: one 8 mm hole each, 15 mm from the base face, centred.

Fit: base flat on the outside of the chain-side rail at its front end, lugs pointing outward; two M6 bolts through the rail.

The arm pivots on an M8 pin through both lugs with a 12 mm spacer each side of the arm; it folds up and is held by a spring clip.

Check: the arm swings up and down freely and stops level.

SEEDLINE
