WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut one 95 mm length of 40 x 20 x 1.5 tube; square ends. It stands
40 mm tall, 20 mm front to back.
Four 6.5 mm holes front to back through both 40 mm faces:
clip holes 12.5 mm from each end, 12.5 mm up from the bottom;
shank holes at mid-length (47.5 mm), 10 and 30 mm up from the bottom.
Fit: between the rails, its bottom flush with the rail bottoms and its
front face 161 mm behind the drive axle (241 mm from the rail front),
held by two corner clips on its rear face. It carries the opener
shank on its rear face; the drive wheel lugs pass 19 mm in front.
Check: square to the rails; the top stands 15 mm above the rails.
