WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut four 25 mm lengths of 25 x 25 x 3 angle; deburr.
Rail leg: one 6.5 mm hole 10 mm from the leg's free end and 12.5 mm up (centred on the 25 mm length).
Cross member leg: one 6.5 mm hole 12.5 mm from its free end, 12.5 up.
The four clips are the same; a left one is a right one turned over.
Fit: one leg flat on the inside face of a rail, the other flat on the rear face of a cross member, heel in the corner. The rail-leg bolt also holds a hopper upright (opener clips) or goes alone (middle).
Check: both legs sit flat with the cross member square to the rail.
