WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Box 170 x 120 x 100 on a funnel 60 tall down to a 66 x 36 neck,
12 tall, 3 mm walls throughout; 2.42 L inside.
Four bosses on each long side face, 20 x 12.5 x 20, at 100 and 150
mm above the neck bottom, 74 mm ahead and 75 mm behind the centre,
with 6.5 mm holes for M5 heat-set inserts pressed in with a soldering iron.
Lid: 174 x 124 x 2 with a 6 mm skirt that drops inside the rim.
Print the hopper upside down on its rim, the lid flat.
Fit: the neck drops into the housing collar with 1 mm all round and
rests on the funnel shoulder; the bosses sit flat on the uprights,
two M5 screws each.
Check: fill with water to the rim: no leaks; 2.4 L.
