WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 40 mm of 25 x 25 x 3 angle.
Upright leg: two 6.5 mm holes 10 mm each side of centre, 12.5 up.
Flat leg: two 6 mm holes 15 mm from the heel, 14 mm each side of centre, for the chain end links (M5 bolt or shackle each).
Fit: upright leg flat on the rear face of the middle cross member, flat leg at the bottom pointing rearward; two M6 bolts.
Hang the two 250 mm chains; they drag on the soil behind the opener and clear the press wheel by at least 15 mm.
Check: the chains hang free and swing without catching.
