WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 594 mm of 22 x 1.2 tube; deburr; fit end plugs.
Two 6.5 mm holes square through the tube, 45 mm from each end, both in the same plane.
Push a 110 mm rubber grip on from each end to 22 mm inside each hole (soapy water helps); the hands hold just inside the side tubes.
Fit: across the back of the flattened tops of the upper tubes, one M6 bolt each through the flat and the grip.
Check: grip level when the seeder stands on both wheels.
